

About Us

With many years of experience providing solutions for a wide range of environmental applications, our highly skilled and trained specialist teams are well equipped to work with you to find the most effective solution for your project.

Our extensive knowledge and experience working in many different environments including SSSI sites and sensitive areas for clients of all sizes from private to civil engineering and infrastructure, on land, above and below water.

Wherever your project, our nationwide coverage allows Murlac to service your project requirements.

Floating Pontoons

Murlac Floating Pontoons provide a modular solution to satisfy specific weight, rigor and stability requirements. Our pontoon modules are high-density, polyethylene cubes providing necessary durability, adaptability and stability.

Murlac Floating Pontoons

Murlac Floating Pontoons are platforms constructed from a modular, lightweight HDPE system that floats on the water and connects using strengthened interlocking pins.

Murlac's Floating Pontoon system is one of the most versatile pontoon systems on the market, with the addition of full height handrails with integrated toe boards, access gates, and an anti-slip contact surface making it ideal for almost all applications.

- Any Size Configuration
- Range of Hand Rail & Edge Protection Systems
- Full Design & Loading Calculations
- Specialist Installation
- Bespoke Fabrication & Graphics
- Support for Heavy Loads

Design & Specification

Murlac's Floating Pontoons are designed to be assembled in many configurations. Our specialist team can help you design a bespoke shaped pontoon with specifications tailored to your project.

Murlac Floating Pontoons are capable of supporting 368kg per m² of evenly distributed weight. For additional weight support, pontoon modules can be layered to support up to 1,000kg per m².

Murlac offers complete solutions, which includes stability calculations right through to bespoke artwork being designed and printed by our graphics department.

Installation & Access

We understand every project has its challenges. Murlac's highly trained installation team are well equipped to overcome any issues they may face, with a lightweight system that can be built on the water without any machinery assistance or cranaage to install.

For further support, Murlac can construct the pontoon system prior to arrival on site, and float it into place. This allows effective time management on the work site and ensures minimal disruption to ongoing works.

Alternatively, if access to the watercourse is difficult the floating pontoon can be deployed at a different location in the watercourse, where it can be guided into place.

Additional Accessories

Ranging from floating walkways, work access bridges and floating platforms for weddings, sports events, on-set filming, and even disabled access. Murlac can provide additional support & accessories that allow you to fulfil your requirements.

Fendering, mooring and creative thinking sets Murlac apart from the rest, when it comes to choosing the right pontoon for your application.

For the more unique applications, Murlac can incorporate boat ramps for mooring and dry storage, semi-sunken floats for swim-up access and egress.

Applications

We make it our priority to work closely with our clients in order to provide a huge variety of floating pontoon solutions, for commercial and private events, whilst providing guaranteed safety and stability.

Construction Sector

From carrying out bridge repairs and inspections, to pedestrian access and walkways. Murlac Floating Pontoons provide you with the safest and most secure platform for use when working on water.

Murlac's specialist team works with our clients to ensure safe systems of work are adhered to at all times.

Additional access systems such as ramps or staircases are available.

Our installation teams are trained to the highest standards in the industry.

Event Hire

Murlac Floating Pontoons are the ideal solution for creating memorable events on and around the water whilst ensuring a safe and secure environment for people and equipment.

The modular system allows full customisation when designing and building the pontoon, meaning you can have your pontoon in many different shapes and sizes.

Pedestrian walkways are a common requirement for many events, and working with Murlac, you are guaranteed to achieve the safest and most cost-effective solution.

Dewatering & Pumping

Murlac's range of walkways, fixed jetties and bridges combine to create a fully comprehensive service for all industrial floating pump platform purposes.

In addition, Murlac offer a variety of pipe floats, for all industrial and commercial use, including water quarrying, dredging, aquaculture and marine applications.

Moonpool pontoons for large scale drawdowns can be supplied with fish protection cages, ensuring complete environmental awareness and compliance.

Access Pontoons

Murlac Floating Pontoons are extremely versatile providing superb buoyancy, strength and functionality.

The durability and buoyancy combined with our innovative module connection couplers creates a system that withstands high-pressure environments whilst maintaining stability. This forms the ideal solution for all heavy-duty industrial works, taking place on or around water.

Film & Production

Film and production events may appear challenging without the correct support when working with water due to restricted access and difficult working environments.

Murlac strives to give advice and solutions to production crew, providing safe access and working solutions, allowing you to be creative.

Our highly experienced team are well placed to advise on the buoyancy required to attain the right look and stability of any set or platform.

Our teams are flexible and available 24 hours a day to set up, move and dismantle floating platforms, in all terrains and environments.

Sporting Events

Our modular pontoons and floating platforms can be used for a wide range of sporting events, from triathlons and sailing races to tough mudders and obstacle courses. Our expert team is able to help design specific pontoons for all types of sports events and races.

The floating modules can be manoeuvred and built as sunken ramps for swimmers entering and exiting the water, viewing platforms and floating platforms for diving purposes.

The flexibility of our floating pontoons means we can meet the requests and requirements of almost all sporting events, with maximum safety and efficiency.

Promotional Advertising

Murlac works meticulously with our clients to help construct floating platforms, walkways and display pontoons for specific promotional events or advertising campaigns.

Our pontoons and platforms can also be covered with a range of materials and carpets to create a specific look, for either an access or viewing platform, allowing novel concepts to become a reality.

Our floating pontoon systems can be branded with company logos and promotional slogans and strap lines as required.

Branding & Bespoke Fabrication

With the latest in CNC routing and large format digital printing, Murlac are able to offer a complete in-house solution for your branding and promotional needs.

Our talented and creative designers will work with you from start to finish to make your ideas come to reality, both on the land and more importantly on water.

We have to date floated vehicles, sculptures and even excavators.

A red Murlac workboat is shown on a body of water. The boat has a black metal grate floor and an outboard motor labeled 'EPROPULSION' at the stern. The name 'MURLAC' is visible on the side of the hull. The background is a calm, greyish-blue water surface.

Safety & Work Boats

Safety is one of the top priorities at Murlac, which is why we ensure that our workboats are on-site to allow secure access during works being carried out.

Our boats are also available to aid with inspections, surveys and provide peace of mind for our clients.

Rigid Workboats

These lightweight yet heavy-duty boats are suitable for a wide range of applications including safety boat work as well as transport boats.

Their generous open deck space and an available payload of 1,600kgs make them an ideal general purpose work boat.

Often used for crew transport, and to carry larger tools and equipment, where access is only available from the water.

Inflatable Boats

Murlac's inflatable boats are strong, super lightweight and have great stability on the water. They have been designed with an aluminium deck providing optimal grip and safety inside the boat.

Quick and easy to deploy, our inflatable boats are the perfect answer to short term safety cover, inspections, and surveys.

Propulsion is provided by both petrol and electric motors depending on the location and task requirement.

Lifejackets

Murlac is committed to providing safe systems of work when working on or near water by providing a comprehensive range of lifejackets and other safety and rescue aids for any project.

Lifejackets

To align with our safe working practices, Murlac provides lifejackets that are ISO 12402 approved for hire and sale.

Our lifejackets are compact, durable, fully adjustable to fit all sizes and designed for commercial use, with many options available such as welding cover, and lighting for night working.

Ranging from 150N to 275N , manual or automatic inflation, the specialist team at Murlac can offer you guidance on the correct selection for your workforce.

Lifejacket Inspection & Training

Lifejackets require regular inspection and servicing.

Murlac is able to inspect and service your lifejacket and operate complete fleet management to ensure that your workforce are always wearing effective PPE.

Not only do we supply, inspect and service lifejackets and other water rescue aids, we can provide recognised training to ensure that your workforce is able to select the correct lifejacket for the task at hand and undertake pre-use checks, ensuring that their safety is at the forefront of any project.
